The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Wells 4,923,276.

Wells discloses an optical system comprising more than two optical sensors (106, 206) spaced in a non-uniform manner; and an infrastructure (108, 110) for relaying outputs from the sensors to a data processing system (114, 118). Each of the sensors includes optical connection means (102, 104) having an aperture of about a meter or less.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Halldorsson et al 4,825,063 disclose a radiation position detection system having a plurality of optical sensors with small apertures.
